Letter to the Examiner

Applicant Summary of Interview with Examiner

10

Commissioner for Patents
Washington DC

Sir:

As discussed in today's interview, being that the examiner finds that the application discloses patentable subject matter vis-à-vis Amerson et al. and it is apparent from the claims and applicant's arguments that the claims are intended to be directed to such patentable subject matter, but the claims in their present form cannot be allowed because of defects in form or omission of a limitation; the pro se applicant requests the help of the examiner under M.P.E.P. §707.07(j) and per M.P.E.P. § 2173.02.

15

20

As stated in § 2173.02 the applicant requests that "the examiner should not stop with a bare objection or rejection of the claims" as in the OA of March 16, 2006. "The examiner's action should be constructive in nature and, when possible, should offer a definite suggestion for correction". If needed the applicant requests that "the examiner should draft claims for the applicant and indicate in his or her action that such claims would be allowed if incorporated in the application by amendment". This request is in order that the undersigned can place this application in allowable condition as soon as possible and without the need for further proceedings.
